## Postdoctoral position in Immunology at the University of Toronto

A postdoctoral position is available immediately in the laboratory of Dr. Götz Ehrhardt at the University of Toronto. Our laboratory is studying regulatory mechanisms governing human memory B cell responses with a focus on the immunoregulatory activity of FCRL molecules. We are investigating the contributions of functionally distinct memory B cell populations to humoral immune responses and explore their potential dysregulation in autoimmune disorders.

Requirements: The successful candidate should be highly motivated and hold a recent PhD in Immunology or a related discipline. Solid background in molecular and cellular biology techniques including multi-colour flow cytometry is required. Experience/interest in single-cell transcriptomics will be of advantage.

Applicants should submit a cover letter describing research experience and interests, a CV and contact information for three references to Dr. Götz Ehrhardt ([goetz.ehrhardt@utoronto.ca](mailto:goetz.ehrhardt@utoronto.ca)).

*The University of Toronto is strongly committed to diversity within its community and especially welcomes applications from visible minority group members, women, Aboriginal persons, persons with disabilities, members of sexual minority groups, and others who may contribute to the further diversification of ideas.*

*All qualified candidates are encouraged to apply; however, Canadians and permanent residents will be given priority.*
